1. Qualitative Information Concerning Financial Statements and Other Matters

(1) Qualitative Information Concerning Consolidated Operating Results

During the first three quarters of fiscal 2011, from April 1 to December 31, 2010, the global economy enjoyed positive growth. Various economic measures implemented by countries around the world took effect and set them on the path to recovery. In particular, the economies of China, Thailand, India and other emerging countries saw strong growth. However, the world economy remains unstable and the outlook unclear, with persistent high unemployment in advanced economies, financial unease in European nations, labor issues in emerging countries, and currency fluctuations.

In the auto industry, both domestic and export demand were strong during the first half. In Japan consumer demand peaked as policies to promote sales took effect, and consumers rushed to take advantage of the final period for government assistance programs for purchasing environmentally friendly vehicles. Export destination countries, on the other hand, saw steady demand for vehicles as their economies recovered. During the third quarter, automobile production in Japan declined sharply as consumer demand fell away following the end of government assistance programs, and export demand was hit by the yen's appreciation. Despite the third quarter decline, however, overall production volumes for the first three quarters were up year on year. Overseas, worldwide automobile production increased. Demand in North America was buoyed by the effects of government policies, and production rose in emerging countries such as China and Thailand due to ongoing economic stimulus policies.

In this climate, the Koito Group reported consolidated net sales for the first three quarters of ¥320.2 billion, up 12.8% year on year, due to growth in sales as a result of increased production in the mainstay automotive lighting equipment segment.

Results by geographical segment are outlined as follows:

[Japan]

Sales in Japan rose 11.7% to ¥193.5 billion. This reflected increased sales in the automotive lighting equipment segment as environmentally friendly vehicle production grew on the back of government measures to promote sales of these sorts of vehicles. Sales also rose in other segments, including railroad car equipment and information systems equipment.

[North America]

Sales in North America increased 5.1% to ¥33.7 billion due to firm automobile production volumes in response to a gradual recovery in consumer spending as government economic measures took effect. Another factor was an increase in new orders and efforts to expand sales.

[China]

Sales in China climbed 25.7% to ¥61.4 billion. This was due to a significant increase in automobile production mainly to meet internal demand amid ongoing economic growth on the back of economic stimulus measures and growth in consumer spending. Another factor was stronger order-winning activities and efforts to expand sales.

[Asia]

Sales in Asia grew 14.5% to ¥22.2 billion as Koito tapped strong growth in auto production based on high economic growth in Thailand and other countries to expand orders for automotive lighting equipment.

[Europe]

Sales in Europe declined 9.7% to ¥9.1 billion. As the economies of Europe continued to slump, the Company worked to expand sales of automotive lighting equipment, mainly to local manufacturers. Sales declined, however, mainly because of currency translation effects.

On the earnings front, the Company saw significant year-on-year improvements in all measures of income, reporting operating income of ¥28.3 billion, recurring profit of ¥25.5 billion and net income of ¥6.4 billion. This result reflected increased sales due to higher automobile production in Japan and overseas, as well as efforts with Group companies to improve business performance by enacting quality improvement programs, curtailing capital investments, and promoting robust measures to cut unit costs.

(2) Qualitative Information Concerning Consolidated Financial Position

- 1. Analysis of assets, liabilities and net assets

Total assets as of December 31, 2010 decreased ¥12.5 billion from March 31, 2010 to ¥345.0 billion, the result mainly of a decrease in trade notes and accounts receivable, a decrease in property, plant and equipment accompanying the curtailment of capital investments, and a decrease in investment securities. These factors were offset partly by an increase in cash and time deposits.

Total liabilities as of December 31, 2010 decreased ¥2.0 billion from March 31, 2010 to ¥177.8 billion, reflecting a decrease in notes and accounts payable and repayment of loans, despite booking an allowance for expenses for damages relating to aircraft seats.

Total net assets as of December 31, 2010 decreased ¥10.5 billion from March 31, 2010 to ¥167.1 billion. Despite an increase in retained earnings from the net income result, the decrease was due to the payment of dividends and a decrease in revaluations and translation adjustments.

- 2. Analysis of cash flows

Operating activities provided net cash of ¥42.2 billion after payment of taxes, mainly reflecting income before income taxes of ¥11.2 billion, depreciation of ¥16.2 billion and a decline in accounts receivable of ¥16.2 billion.

Investing activities used net cash of ¥36.7 billion, mainly reflecting payments into time deposits of ¥24.3 billion and capital investments of ¥13.5 billion.

Financing activities used net cash of ¥9.3 billion, the result mainly of ¥4.8 billion in debt repayment and a ¥4.4 billion in dividends paid.

As a result, cash and cash equivalents as of December 31, 2010 were ¥25.5 billion, ¥4.6 billion lower than on March 31, 2010.

(3) Qualitative Information Concerning Forecast of Consolidated Results for Fiscal 2011

We expect economic conditions inside and outside of Japan to remain adverse, despite signs of recovery in some areas. Among other factors, economic stimulus measures in each country are coming to a close, or losing their potency, fluctuations in stock prices and foreign currency rates are weighing on corporate earnings, and employment remains unstable. Moreover, the automobile industry is being threatened by the drop off in demand following the end of the government's assistance programs for purchasing environmentally friendly vehicles, and by falling exports brought on by the yen's appreciation.

Under these conditions, the Koito Group will enhance efforts to expand orders, boost productivity, and improve its mutually complementary supply network and structure. We will also work to improve our operating performance going forward. In particular, we will strengthen our earnings structure through ongoing activities to improve our business performance, and respond appropriately to growth markets.

For fiscal 2011, the Koito Group is projecting increased sales on higher orders, mainly for hybrid cars and other environmentally friendly vehicles, and expanded sales of new products.

In terms of earnings, we expect operating income, recurring profit and net income to increase compared with the previous fiscal year. This outlook is based on forecast higher sales and robust measures initiated last year in Japan and overseas to bolster productivity, reduce costs, and curb capital expenditures, among other activities.

We have decided to maintain the interim dividend of ¥10 per share, the same level as last year. The full year dividend for fiscal 2011 has not yet been decided as the outlook for the business environment remains uncertain. The Company will announce the full year dividend projections at a later date following close consideration of business trends going forward.

Looking ahead, we will continue in our efforts to achieve even higher earnings to meet the expectations of all shareholders.

The differences between the above forecast for fiscal 2011 and that announced on October 27, 2010 with the Consolidated Earnings Report for the Second Quarter are as follows:

2. Other Information

(1) Changes to important subsidiaries during the third quarter:

None

(2) Application of simplified accounting methods, and of special accounting:

None

(3) Changes in accounting principles, procedures, methods of presentation, etc.:

(Application of Accounting Standard for Asset Retirement Obligations)

From the first quarter of fiscal 2011, the Company has applied the Accounting Standard for Asset Retirement Obligations (ASBJ Statement No.18; March 31, 2008) and the Guidance on Accounting Standard for Asset Retirement Obligations (ASBJ Guidance No.21; March 31, 2008).

This change will have no effect on operating income, recurring profit, or income before income taxes.

The Company leases certain of its factories and structures as well as land, in Japan and overseas. Based on the real estate lease agreements, when vacating these properties the Company is obliged to return them to their original condition. However, it is uncertain how long these lease assets will be in use. As of the release of this report, there are no plans to relocate any of the relevant facilities, and the Company cannot reasonably estimate its asset retirement obligations for these assets. Therefore, these asset retirement obligations are not listed.

(Change in Purpose for Holding Marketable Securities)

As of September 30, 2010 securities that had previously been securities held to maturity (book value ¥43,505 million) have been reclassified as other securities.

This reflects a change in our asset management policy, in which we have reviewed the purpose for holding marketable securities and will now consider selling securities held to maturity going forward.

As a result, the valuation adjustment on investment securities at December 31, 2010 has decreased by ¥4,121 million.

[Segment Information]

1. Overview of Reporting Segments

The Koito Group produces primarily automotive lighting equipment in Japan and overseas, and supplies products to countries around the world as a global supplier. Each local subsidiary is an independent business entity, and the Group does business by establishing a comprehensive plan for each region. The Company's 5 reporting segments are therefore geographical segments based on production and sales structures, comprising Japan, North America, China, Asia and Europe. Within each of these geographical segments are segments that produce and sell automotive lighting equipment, railroad car control equipment, aircraft components, and seats for railroad cars and aircraft.
