KOITO MANUFACTURING CO., LTD.

**The Aircraft Equipment Division of Koito Acquires  
an ISO9001 Certification**

The Aircraft Equipment Division of KOITO MANUFACTURING CO., LTD. acquired the certification of ISO9001, the international standard concerning the quality management and quality assurance, from the BSK System Investigation Center of the Foundation Entity, "Japan Defense Material Foundation" (the name changed to Defense Procurement Development of Infrastructure Institute as from Mar. 1).

The applicable range of certification covers the design, development, manufacture and other relevant services in connection with the products and their conversions such as lighting equipment for aircrafts, electronic devices and electric devices, warning display devices and hydraulic equipment.

The aircraft equipment division of our company is primarily performing the company's policy of "Quality First", and is engaged in activities through which it could provide the users with reliable and satisfactory quality. A further step-up of quality management will be realized by obtaining the ISO9001 this time.

In Koito, the Shizuoka Plant and two other plants have already obtained on Jan. 12 "ISO14001" certification, the international standard concerning environmental management, but this is the first acquisition in the field of ISO9001.
